

RUBBER AID PA70

TECHNICAL DATA SHEET

Issue No : 002/01

Date: 01.07.2020

Product Name:

RUBBER AID PA 70

Rubber Processing Additive / Dispersion Agent / Flow Modifier / Lubricants

Composition:

Blend of Zinc Soaps of Unsaturated Fatty Acids and Esters

Typical Properties

Appearance	: Beige - Light Brown Pastilles
Specific Gravity	: 1.1 ± 0.05
Dropping Point (Mettler Method, °C)	: 95 - 110
Ash Content (850 °C / 2Hr, %)	:15.5 – 17.5

Suggestions / Recommendations for Applications

Rubber Aid PA 70 is a processing additive which improves dispersion of white and black fillers and therefore suits best for tread compounds based on S-SBR with high levels of silica.

- With Rubber Aid – PA 70 processing additive, fast incorporation and improved dispersion of the silica without sacrifice in wet skid resistance could be achieved.
- It could facilitate improved flow property compared with common zinc soaps as well as increased energy savings in the mixing step.
- It should be added together with the filler into the kneader for a quick dispersion of silica and carbon black.

Dosage:

3 – 5 phr

Packaging

Packed in 25 kilo Paper Bags / Cartons

Shelf Life & Storage conditions.

It is stable for 2 (two) years from the date of manufacturing. It should be stored in a cool dry place. Retest can be done after 2 years for extension of validity of the properties of the product.

Handling Precaution

Refer SDS for complete details
